

Dispensa – Matic U25

Roll Roll Fed Labels or Fanfolded Labels can be dispensed up to a maximum web width 63mm butt cut or die cut and adjustments for different size labels are made easily without the need for tools. Maximum roll diameter 225mm on a core size of 75mm.

Weight: 3 Kgs

Dimensions – 150 x 160 x 200mm.

Dispensa – Matic U45

Roll Fed Labels or Fanfolded Labels can be dispensed up to a maximum web width 114mm butt cut or die cut and adjustments for different size labels are made easily without the need for tools. Maximum roll diameter 225mm on a core size of 75mm.

Weight: 4 Kgs

Dimensions – 253 x 279 x 203 mm.

Dispensa – Matic U60

Roll Fed Labels or Fanfolded Labels can be dispensed up to a maximum web width of 152mm butt cut or die cut and adjustments for different size labels are made easily without the need for tools. Maximum roll diameter 225mm on a core size of 75mm.

Weight: 5 Kgs

Dimensions – 279 x 279 x 203 mm

Dispensa – Matic 10-II

For Large Roll Labels butt cut or die cut, these new high speed units will enhance application of most large labels on rolls up to 229mm in diameter and up to 225mm in overall width. Any depth of label 1 across, and up to 76mm deep for multi widths.

For Fanfolded Labels the machine will handle 1 across and multi width formats up to 254mm maximum web width. Any depth of label 1 across and up to 76mm deep for multi widths.

Adjusts to all widths and can be changed from roll to fanfold in seconds without the need for tools.

With small modifications these machines will dispense deeper labels and most materials including polymers and foils.

Weight: 5 Kgs

Dimensions – 380 x 270 x 160 mm

Dispensa – Matic 16-II

For Large Roll Labels butt cut or die cut, these new high speed units will enhance application of most large labels on rolls up to 229mm in diameter and up to 380mm in overall width. Any depth of label 1 across, and up to 76mm deep for multi widths.

For Fanfolded Labels the machine will handle 1 across and multi width formats up to 405mm maximum web width. Any depth of label 1 across and up to 76mm deep for multi widths.

Adjusts to all widths and can be changed from roll to fanfold in seconds without the need for tools.

With small modifications these machines will dispense deeper labels and most materials including polymers and foils.

Weight: 5 Kgs

Dimensions – 380 x 270 x 160 mm

Flex-Matic

The Flex-Matic has been developed to accurately apply labels to a wide range of flat products including Bags, Envelopes, Pamphlets, PCB's etc. up to a maximum thickness of 4mm.

It is easily set to position the labels horizontally and vertically on the products (minimum of 19mm from the leading edge vertically.)It is possible to apply labels to continuous media providing a cut out is included to activate the feed sensor.

Most self adhesive materials can be applied including polymers and book labels but we always recommend testing them before purchase.

Weight: 18 Kgs

Dimensions – 550mm x 430mm x 200mm
